

## Approaches that can kill

Ray will lead a lively presentation on approaches to various airports for both VFR and IFR pilots. All of the approaches appear to be easy and rather unchallenging on the surface. However, they all have easily overlooked characteristics and requirements that could end deadly if not correctly executed. Topics will include, preflight review, setting up the approach (both VFR and IFR), understanding other factors (such as terrain), review of aircraft performance required, ADM considerations, single pilot operations, and regulatory requirements.

**Directions:** ATRC is on the south side of Trinity Mills about 500 feet east of the stoplight at Kelly Blvd. ATRC is on the east side of the building about 1/2 way back. The contact us page on our website shows pictures of the building.

### A message from the National FAASTeam Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

### Event Details

**Wed, Dec 5, 2012 - 7:00 pm**  
**Aviation Training and Resource Center**

2550 East Trinity Mills Rd  
Suite 126  
Carrollton, TX 75006
